

**AgReserves, Inc.**

## **GEOGRAPHIC INFORMATION SYSTEMS (GIS) INTERN**

**Location: Salt Lake City, Utah (USA)**

### **Description:**

AgReserves, Inc. is a multi-national, multi-corporate company that operates investment farms and ranches throughout the world. This position is an excellent opportunity to gain hands on experience using GIS and working in a professional and active atmosphere. The successful applicant would work approximately 40 hours a week for up to 12 months in our Salt Lake office.

### **Duties and Responsibilities:**

- Enter data into GIS databases, using techniques such as coordinate geometry (COGO), keyboard entry of tabular data, manual digitizing of maps, or conversion of other sources of digital data.
- Use ESRI's ArcGIS software and its accompanying tools to map out written legal description information.
- Assist in GIS data creation and help implement a company-wide initiative to accurately maintain company land assets and help streamline that process for future development needs.
- Create outputs, such as maps and graphs, using computer and geographic information system software and related equipment.
- Present information on current projects to users, and answers questions.
- May use ESRI ArcPad and Trimble GPS units to collect geometry, populate attributes, and refine feature classes in an Enterprise GIS environment in the field.

### **Skills & Education:**

- Must be a student or recent graduate seeking/with a degree in Geography, Natural Resource, Agriculture or related major from an accredited school.
- Working experience with ESRI's ArcGIS suite of Software a plus.
- Understanding of GIS concepts and principles required.
- Experience with ArcGIS Online and Collector for ArcGIS a plus.
- Ability to communicate technical information to non-technical staff.
- Attention to detail is critical.
- Ability to be prompt and hard-working is a must.

### **Benefits:**

Compensation will commensurate with experience.
